

## Ontario TBI Report Card, 2017/18:

# NORTH WEST LHIN

Ranked 1 or 2 of 14 LHINs  
Ranked 13 or 14 of 14 LHINs

Indicator no.	Care continuum category	Indicator	2017/18 (2016/17)	Ontario 2017/18	Variance across LHINS (min-max)	Rank
1	Prevention	Annual age- and sex- standardized incidence rate for TBI per 1,000 population (%)	3.38 (3.38)	2.39	1.85-3.42	12
2	Prevention	Annual risk-adjusted mortality rate within 30 days of admission for TBI <sup>1</sup> (%)	25.38 (14.83)	13.32	10.98-25.98	14
3	Acute management	Proportion of alternate level of care days to total length of stay in acute care (%)	16.54 (21.67)	24.31	12.90-36.34	3
4	Acute management	Proportion of acute TBI patients discharged from acute care and admitted to inpatient rehabilitation (%)	17.02 (21.37)	19.97	12.68-28.52	9
5	Rehabilitation	Median days from TBI onset and admission to inpatient TBI rehabilitation	20 (11)	17	10.5-34.5	9
6	Rehabilitation	Median days from discharge from acute or inpatient rehabilitation to first homecare therapy visit	17 (11)	9	5-27	11
7	Rehabilitation	Median number of homecare therapy visits among TBI patients discharged from inpatient acute inpatient rehabilitation	3 (3)	4	3-7	14
8	Reintegration	a) Proportion of TBI patients discharged from inpatient rehabilitation with a GP/FP follow-up assessment within 30 days of discharge (%)	42.86 (64.52)	76.12	42.86-87.30	14
		b) Proportion of TBI patients discharged from inpatient rehabilitation with a follow-up assessment with a specialist within 180 days of discharge (%)	71.43 (51.61)	67.32	55.80-82.56	6
9	Reintegration	Proportion of TBI patients discharged from acute care to CCC/LTC <sup>2</sup> (%)	6.52* (7.14)	5.7	1.29*-9.64	11
10	Reintegration	Mean total LOS days in institutional-based care in the first 90 days from TBI onset <sup>2</sup> (%)	6.16 (6.03)	7.92	5.29-9.09	13
11	Reintegration	Age- and sex-adjusted all-cause readmission rate at 30 days for patients with TBI (%)	4.99 (4.59)	4.18	3.02-4.99	14

\*Exact counts suppressed for privacy, the average of the maximum and minimum value presented.

<sup>1</sup> Patients who were alive when they arrived at the emergency department and admitted to hospital were included in the 30-day mortality rate.

<sup>2</sup> Excluding patients originating from LTC/CCC.

Note: Traumatic brain injury (TBI); General practitioner (GP); Family physician (FP); Complex continuing care (CCC); Long-term care (LTC).
